

COST Actions – COSTi võrgustikuprojektid

Kontakt: Katrin Kello, katrin.kello@etag.ee

50 years of science without borders

COST Association – Euroopa vanim valitsustevaheline koostööprogramm teaduse ja tehnika valdkonnas, loodud 1971

Liikmeks riigid, põhiline raha raamprogrammist

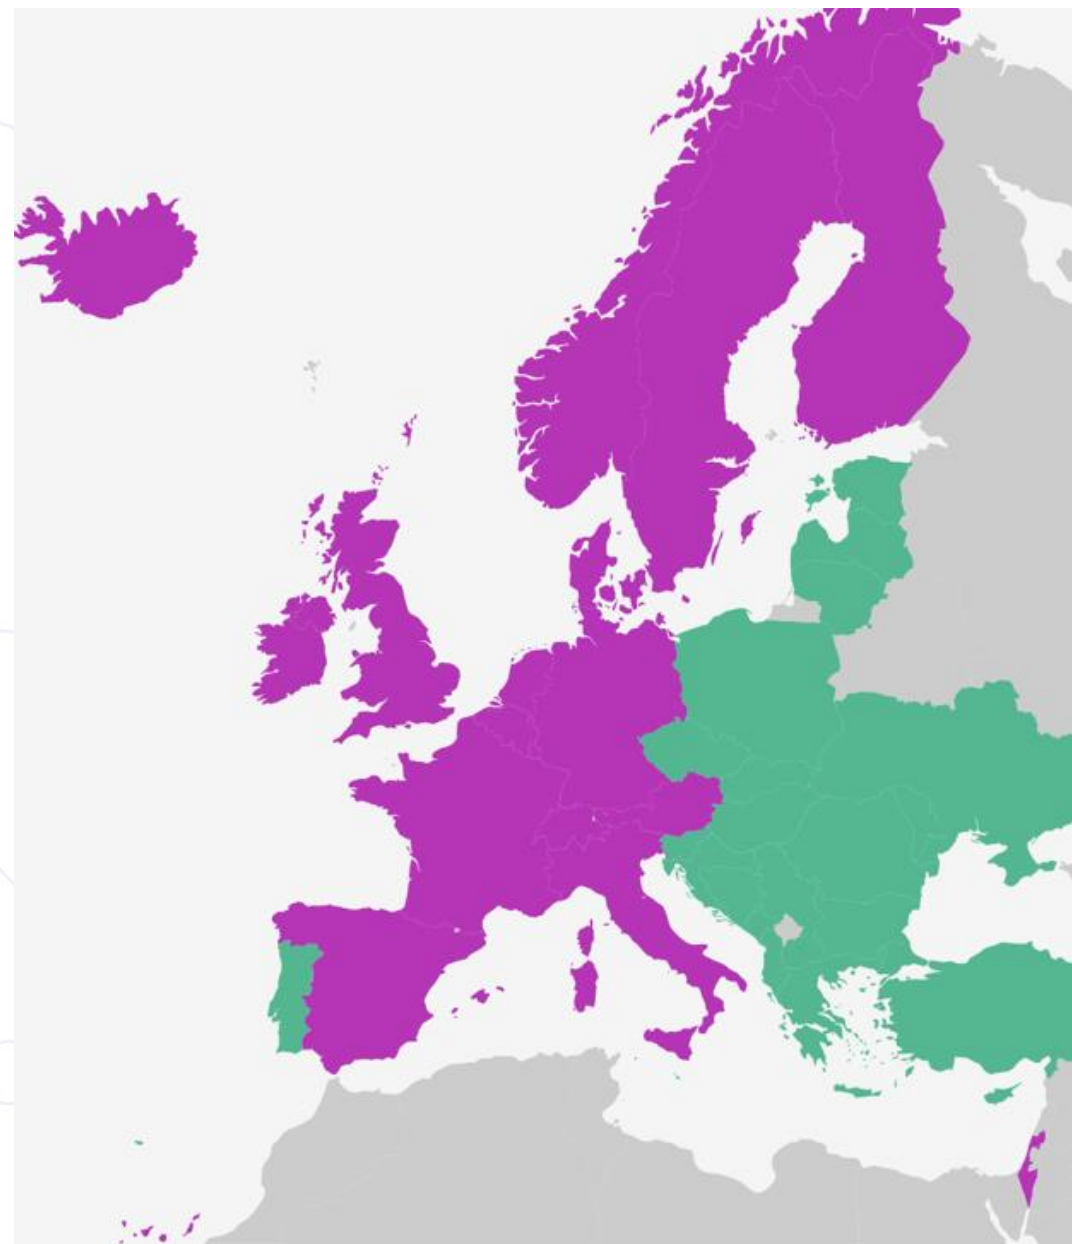

Oma reeglid ja traditsioonid, oma portaal **cost.eu**

Korraga 200–300 rahastatavat võrgustikuprojekti

41 Euroopa riiki + Iisrael + LAV + lähinaabrid – kuid oma vahenditest võib osaleda kogu maailm

Põhijooned

- eesmärk: **tuua kokku** mingi valdkonna või temaatikaga **juba tegelejad**
- taotlejatel on **idee**, COST aitab ehitada laialdase võrgustiku selle ümber
- avatud kõigile (teadus)valdkondadele
- **indiviidikeskne** osalus
- palga- jm tegevustoetust pole ette nähtud: **rahastus reisimisele, korraldamisele, avaldamisele** → tõhus rahakasutus
- **liitumine kogu projekti kestel: taotleja ≠ osaleja!**

Conference Grants

Eripärad

eelarve ei ole taotluse osa, rahastuse arvutab COST igal aastal uuesti, lähtudes osalejate arvust ja plaanitud tegevustest (üldised piirid-raamid muidugi olemas)

ainus asutus võrgustikuprojektis on grandihoidja (*grant holder*)

muu asjaajamine otse teadlasega, e-COSTi konto kaudu

kõik teised osalejad on üksikisikud

projektid on uutele osalejatele avatud kogu projekti kestel (reeglina neli aastat)

Osalejate mitmekesisus

Oodatud ka praktikud: rakendajad, katsetajad, sidusrühmade esindajad: ettevõtted, avalik ja kolmas sektor

Kaasatakse juba taotlusse, kutsutakse kampa projekti käigus, kaasatakse sihtrühmadele suunatud üritustesse

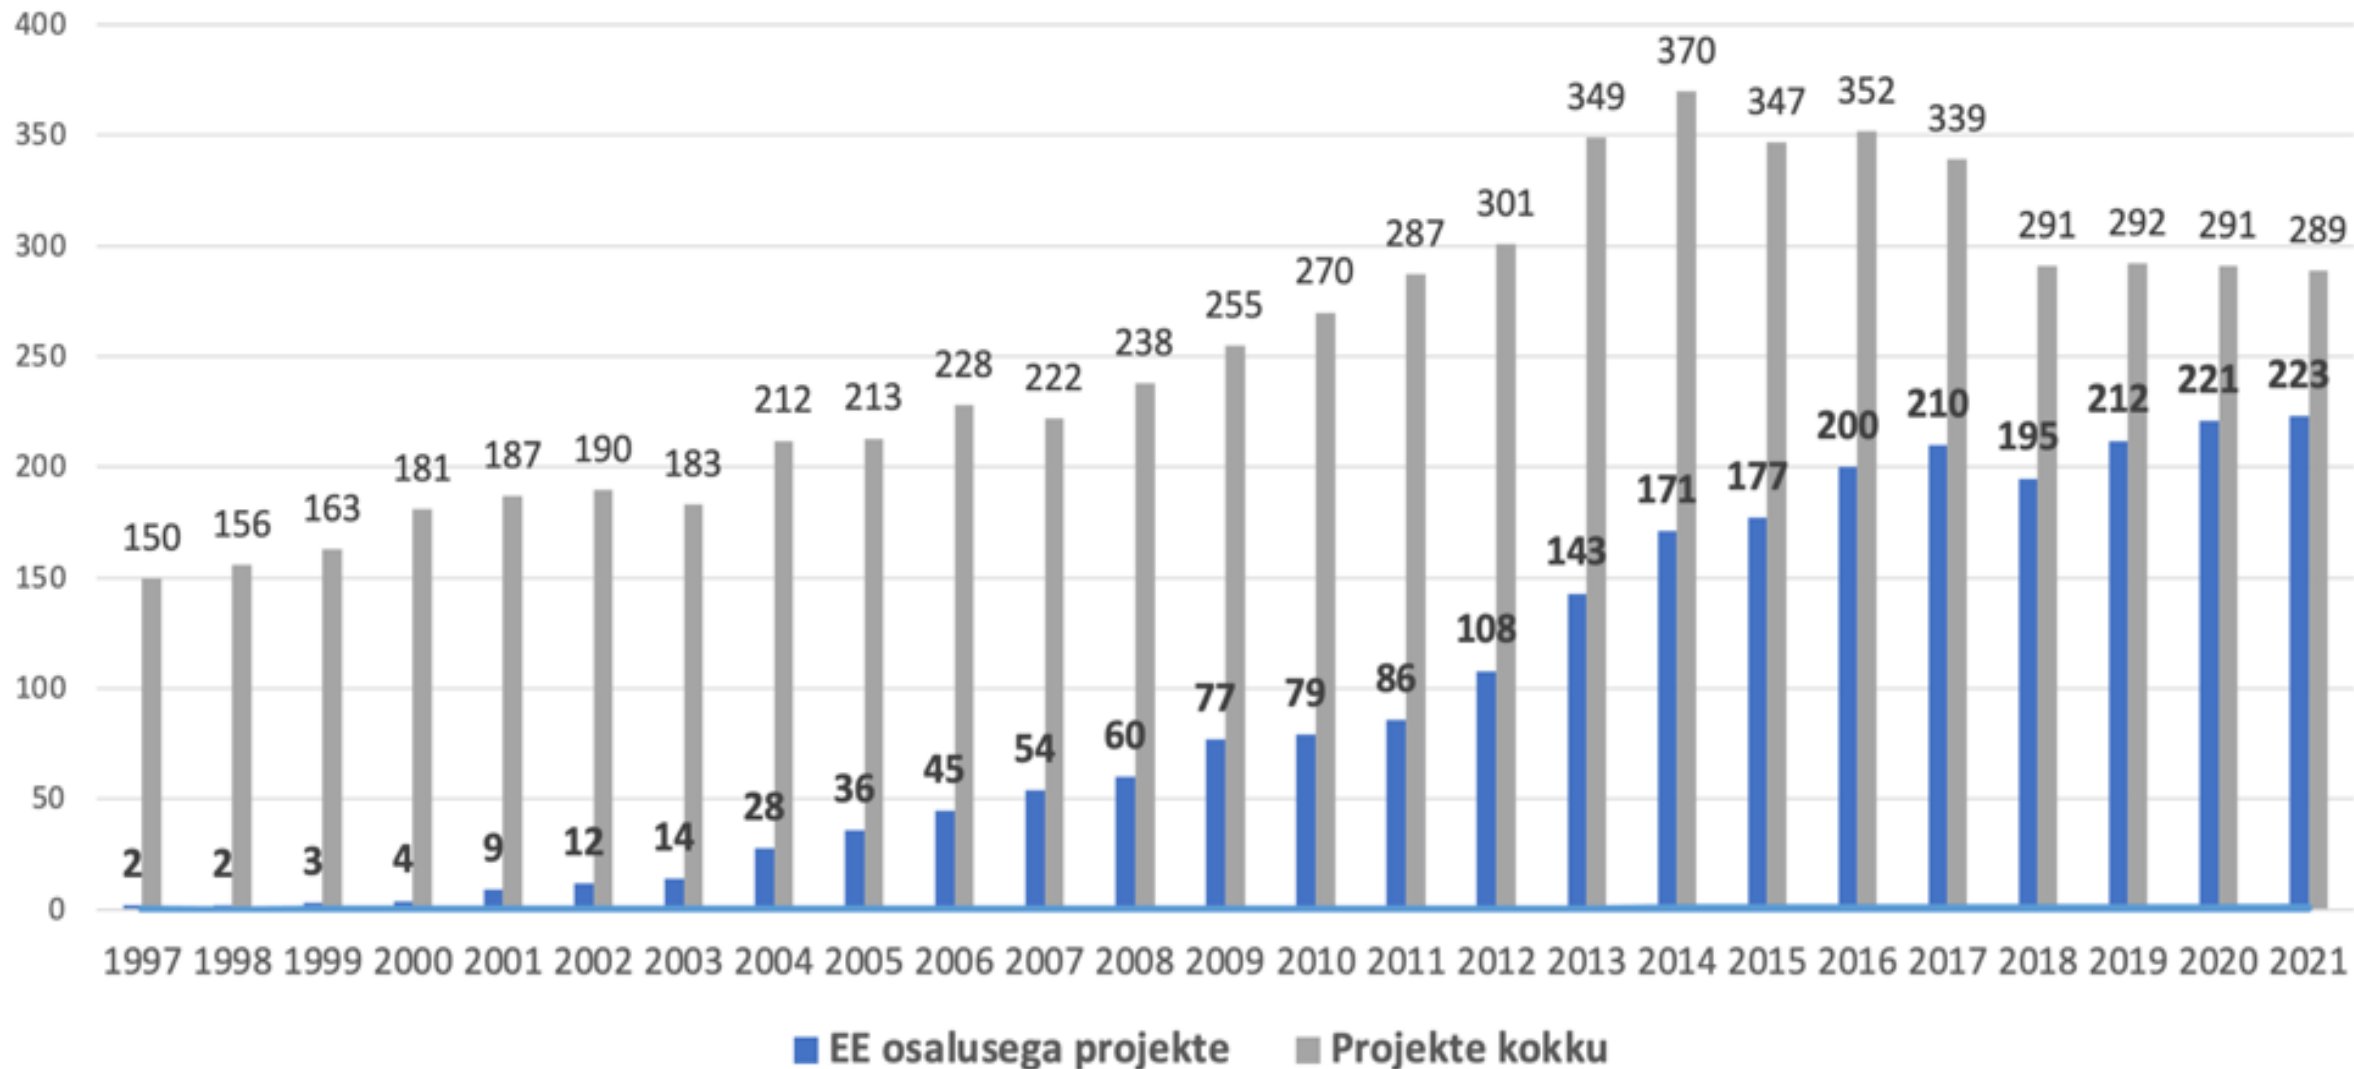

„Noore teadlase“ asemel mõiste „noor teadlane ja innovaator“

Hiljuti uus toetus: *COST Innovators Grant* – aastased jätkuprojektid tavalise projekti tulemuste turulähedasemaks tegemiseks

Keerukused

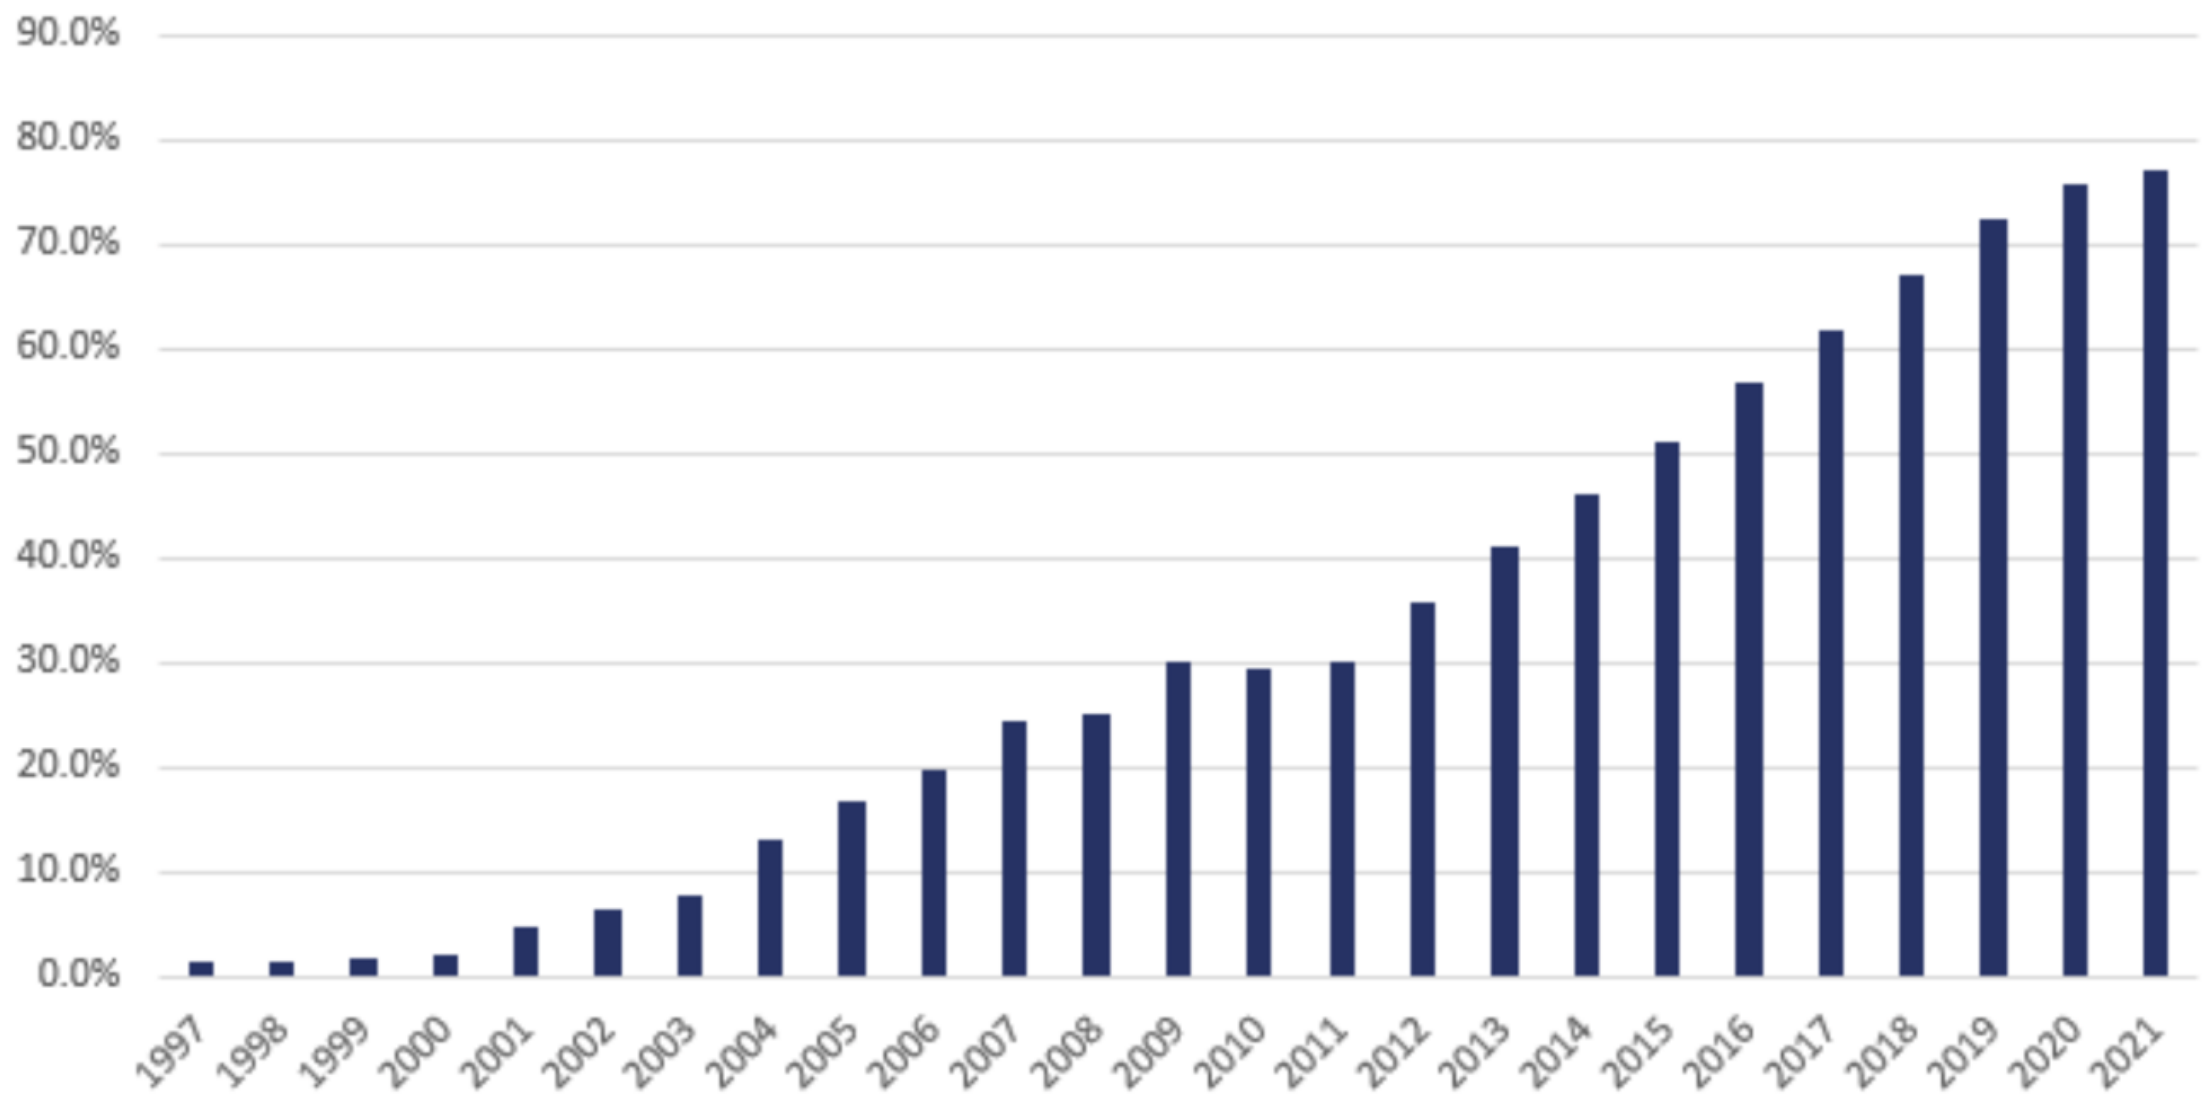

- osalus muude tegevuste kõrvalt või käigus (sisulisi tegevusi ei toetata)
- ligi aastapikkune ooteaeg taotluse tähtajast projekti alguseni

Eesti osalusega projektid 1997–2021

Sama protsentidena :)

Percentage of Actions with Estonian participation

Description

SHiFT proposes the creation of a transdisciplinary Hub to address existing challenges in advancing timely societal transformations in the face of climate change. It includes the delivery of a plan of action-focused missions, initiatives, and digital content creation. The Hub comprises a core group of SSH transdisciplinary researchers and practitioners and their extended networks with a focus on unfolding the benefits of engaging with transformation in practice and exploring the role of digital technologies in these contexts. Research and practice will focus on identifying and engaging with transformation in practice and exploring the role of digital technologies in these contexts. The SHiFT Hub will focus on

Enabling creative technology to form a “critical network of care”

An interdisciplinary group of creative practitioners, academics, researchers and arts/crafts organisations that specialise in creative technologies have come together to form a “critical network of care.”

The Action’s network will collaborate to share their collective expertise and technical knowledge employed in creative ways to develop knowledge and methodologies of care.

The main aim is to produce a well formulated and integrated **Toolkit of Care** and comprising articles, prototypes, audiovisual documentation, technical manuals, theoretical analysis, and data. It will act as a model of how to successfully share knowledge and expertise across different geographical regions and social groups.

(Open Calls)

Description	Management Committee	Main Contacts and Leadership	Working Groups and Membership
--------------------	----------------------	------------------------------	-------------------------------

Description

The NETPORE COST Action will create an international network of world-class researchers and stakeholders to promote joint ideas and initiatives aiming to bridge the gap between fundamental developments and practical applications of technologies based on porous semiconductors and oxides.

Recent fundamental advances in porous semiconductors and oxides have demonstrated promising performance of these platform technologies for a broad range of energy and health applications. But the bench-to-bedside translation of these advances remains challenging. Current factors preventing these technologies from reaching the market are: product reliability, cost-effectiveness of production, uncertain long term performance and benchmark reference, and added value of the final product.

NETPORE COST Action network will foster cutting-edge research and innovation in this technological field by providing opportunities for joint projects through Working Groups, bringing together a wide pool of expertise across academia and industry.

NETPORE COST Action network will: i) develop of a joint research roadmap to boost the transfer of knowledge by coordinating strategies among different actors with the objective of addressing big societal challenges in energy, health and the environment, harnessing advanced technologies using porous semiconductors and oxides; ii) act as a platform to further advance potentially marketable technologies by identifying strengths and weaknesses, needs and requirements of markets; iii) create venues to disseminate these technological advances and provide technical formation activities for young emerging researchers; and iv) promote networking activities in order to attract talent, build more and better joint research projects with clearly defined objectives to exploit technological advances and open exciting new business opportunities.

- Inform the Main Proposer/Chair of your interest ([email](#))
- [Apply](#) to join your Working Groups of interest

17 Töörühmaga liitumise ankeet

Working Groups *

The details listed are coming from your e-COST profile and are necessary for the approval of your WG application. In case you find something is outdated, please go to [My profile](#) and update it accordingly.

- 1. Small-medium island ecosystems: natural capital assessment
- 2. Ecosystem Services of Small-medium islands
- 3. Effects of Land use and climate changes (LU/CC) on ES
- 4. Nature-based solutions (NbS) for safeguarding ES of small-medium islands
- 5. Policy and Governance of Small-Medium Islands for ES provision
- 6. Dissemination, Participatory and user-centered design processes

The Working Group structure is subject of approval at the 1st Management Committee Meeting.

Scientific Background *

Maximum 150 words: please describe here in a brief manner your scientific background relevant for the COST Action.

Motivation *

Maximum 150 words: please describe here in a brief manner your motivation to join the COST Action.

Working Group Contribution *

Maximum 150 words: please describe here how you plan to contribute to the Working Group(s).

- I'm available to be nominated as MC member

Please contact in parallel the COST National Coordinator (CNC) of your COST Member Country ([COST National Coordinators](#)) for your nomination.

- I'm available to substitute the MC member/observer of my COST member country or Specific Organisation on an ad-hoc basis

Korralduskomitee: MC, sisuliselt üldkogu

- oma riigi (osalejate ja sidusrühmade) vaatenurga esindamine, info vahendamine
- tegevuste üldine koordineerimine, töörühmade tegevuse üldine jälgimine
- uute töörühma- ja korralduskomiteeliikmete vastuvõtmine (pärast avakoosoleku toimumist)
- rahakasutuse jälgimine ja sellealased otsused, sh üritustel osalejate ringi, teaduslike külastuste (*STSM*), avaldamiskulude jms heakskiitmine
- jms

COSTi projektis (*COST Action*) osalemise tasandid

- Osalus on indiviidipõhine
- **Ad-hoc-osalus** näiteks üritustel, koolitustel, *STSM*, lühiajaline panustamine töörühmas
- **Püsiv osalus** kahel tasandil:
 - Töörühm ehk *WG* – keskne ja esmane. Alates 2021 tuleb täita elektrooniline ankeeti COSTi veebilehel.
 - Korralduskomitee ehk *MC* – ei ole enam riigile kohustuslik, kuid endiselt väga soovitatav, tuleb täita huviavalduse ankeet ETAGile
 - varasemast tuttav püsiv asenduliikmeroll kaotati 2021, selle asemel konkreetseks ürituseks või kuni 6-kuuliseks perioodiks määramine oma riigi *WG*-liikmete hulgast

Asutuse rollid:

- asutus ehk *primary affiliation* e-COSTis määrab riikliku kuuluvuse
- ainus COSTi projektis osalev asutus on grandihoidja (*Grant Holder*)

Huvi ja mis tahes küsimuste korral võta julgesti ühendust!

1971. aastal asutatud **COST** (*European Cooperation in Science and Technology*) on Euroopa vanim valitsustevaheline koostööprogramm teaduse ja tehnika valdkonnas. Praegu toetatakse COSTi tegevusi Euroopa Liidu raamprogrammi „Euroopa horisont” eelarvest. Eesti on olnud COSTi liige alates 1997. aastast.
