1945

# Ma valetasin, kuid mille kohta?

- Autor pole Eerik Haamer.
  - Eerik Haamer ei põgenenud selliselt Rootsi.
  - See pole küüditamine.
  - See pole üldse Eesti.
  - Kõik eelnev.
- Ma valetasin, et valetasin, kogu jutt oli tõde.

# Miks hukkus MH17?

- Uus Maailma Kord (NWO) tahtis alata Kolmanda maailmasõja.
- Raketi lasi Ukraina.
- NATO soovis tappa Putinit.
- See oligi kahtlane kuupäev ja korduvad numbrid (midagi eriskummalist ja ebamaist).
- Iisrael soovis enda tegemistelt Gazas tähelepanu kõrvale juhtida.
- Need olid illuminaadid või siis tulnukad.
- Keegi soovis varjata maailma AIDSi-teadmisi (hukkus mitu eksperti).
- Ja kui eelnevast ei piisa (need kõik ei saa ju valed olla!?), oli see kõik lavastus.

Why did MH17 crash?

### ChatBox

MH17, a Malaysia Airlines flight, crashed on July 17, 2014, resulting in the loss of all 298 lives on board. The crash occurred over eastern Ukraine, near the border with Russia. The official investigation, led by the Dutch Safety Board (DSB), concluded that the aircraft was shot down by a Buk surface-to-air missile system.

According to the investigation, the missile was launched from an area controlled by pro-Russian separatists during the ongoing conflict in Ukraine. The missile struck the left side of the cockpit, causing the aircraft to break up in mid-air. The investigation did not assign blame to any specific group or individuals for launching the missile.

The area where the crash occurred was a conflict zone, and there were previous instances of military aircraft being shot down in the region. However, MH17 was flying at an altitude that was considered safe by international aviation authorities. The tragedy highlighted the need for improved coordination and communication between airlines and authorities regarding flight over conflict zones.

✦ 1

Give me 3 alternative versions that contradict the official version.

ChatBox

1. Alternative Version 1: The crash was caused by a technical malfunction or pilot error. This theory suggests that the official investigation's conclusion of a missile strike is incorrect. Proponents of this theory argue that there is no concrete evidence linking the crash to a missile, and that it is possible that the plane experienced a catastrophic failure or was brought down by human error.

2. Alternative Version 2: The crash was a false flag operation. This theory suggests that the crash was intentionally staged by a third party to create a pretext for military intervention or to manipulate public opinion. Proponents of this theory argue that the timing and location of the crash were suspicious, and that it served the interests of certain political actors.

3. Alternative Version 3: The crash was caused by Ukrainian forces. This theory suggests that Ukrainian military forces shot down MH17 either intentionally or accidentally. Proponents of this theory argue that Ukraine had the means and motive to bring down the plane, and that there is evidence suggesting Ukrainian involvement, such as radar data and witness testimonies.

For fun, generate two more versions that seem highly unrealistic, but possible.

ChatBox

Certainly! Here are two highly unrealistic but possible alternative versions:

4. Alternative Version 4: The crash was caused by extraterrestrial interference. This theory suggests that MH17 was brought down by an unidentified flying object (UFO) or some form of advanced alien technology. Proponents of this theory argue that the sudden and unexplained nature of the crash could be attributed to extraterrestrial intervention, possibly as a result of mistaken identity or an experiment gone wrong.

5. Alternative Version 5: The crash was a result of time travel gone wrong. This theory suggests that MH17 was inadvertently caught in a temporal anomaly or a time travel experiment, leading to its destruction. Proponents of this theory argue that the unusual circumstances surrounding the crash, such as the lack of a clear cause and the absence of a distress signal, could be explained by a temporal disruption that caused the plane to vanish from its original timeline.

🌟 1

Again, it is important to note that these

Great fun! Can you add two versions that would blame Estonia?

ChatBox

Certainly! Here are two alternative versions that would blame Estonia for the crash of MH17:

6. Alternative Version 6: The crash was caused by Estonian intelligence agencies. This theory suggests that Estonian intelligence agencies, in collaboration with foreign entities, orchestrated the downing of MH17 to create a false flag operation. Proponents of this theory argue that Estonia had a motive to create a crisis and gain international sympathy, possibly to divert attention from its own internal issues or to provoke a military response against Russia.

7. Alternative Version 7: The crash was a result of Estonian air defense incompetence. This theory suggests that Estonian air defense systems mistakenly identified MH17 as a threat and shot it down. Proponents of this theory argue that Estonia, being a small country with limited resources, may have had inadequate training or faulty equipment, leading to a tragic mistake. They also point to the fact that Estonia is a NATO member and the incident could have been used to justify increased military presence in the region.
